

Meet The MD!

Hi, I'm Grant Phillips, Managing Director of GPC Group! I'm delighted that you want to learn more about GPC Group and the services and products we offer.

Over the last ten years, my focus has been building international partnerships and collaborations with clients across the cleaning industry. I support my clients to “clean higher, safer and faster” with the world’s leading high-level vacuuming system, SpaceVac.

During my career, I discovered a passion for building strong relationships whilst providing unique specialist services. However, I also knew there was so much more I could do to support the cleaning industry, to enhance the safety of their teams, facilities and operations. This led to me establishing GPC Group in January 2021.

GPC Group's mission is simple:

“We clean, we sell, we hire, and our services go beyond 100%.”

When it comes to high-level cleaning – only specialists will do. My ambition is to make GPC Group the number one high-level cleaning company people trust for partnerships and collaboration.

Agility in the services we provide is paramount. Whether you need an external gutter clean, internal high-level dust removal or to buy and train your in-house team to complete the cleans themselves, we are here to help.

I'm confident GPC Group can bring unique value to your business. I look forward to building successful partnerships across the UK, internationally, and hopefully with you!

Grant Phillips
